

FireMaster: Fire Resistant Cabinets

Would your valuable records survive a fire?

A small fire can rapidly turn into a raging inferno in a matter of seconds. If your business is to survive such a disaster, all your important records must survive that fire.

Customer files, debtors and creditors records, insurance records, trust deeds, company memorandum and articles, wages and tax records, sales tax and stock records.

FIREMASTER fire resistant cabinets have been manufactured to meet the requirements of the JIS-S-1037 Fire and Drop test, assuring you of the protection of your company records for the prescribed period should disaster strike unexpectedly.

These units are not suitable for storage of cash/or valuables. Please speak to your Firemaster agent about the Guardmaster range of security safes.

Two Hour Fire Rating.

Specifications

Construction

The Firemaster fire resistant cabinets are constructed from new formula special protection materials which provide excellent fire resistant.

Locking

The units are secured by one keylock and one keyless combination lock. The combination from model F40 upwards is changeable and the locking mechanism is protected by an automatic relocking device. This will activate automatically in the event of force or attack to the lock.

Options

This type of cabinet is not designed to protect computer media such as, computer discs, tapes, videos, film or negatives. Talk to your Firemaster agent about magnetic media containers or fitted media inserts.

The manufactures Policy is one of constant improvement. They reserve the right to alter any part of these specifications without notice and without incurring any obligation.
