

## Guardmaster Fortress Safes

**The Guardmaster Fortress** series of freestanding safes are ideally suited to Commercial and Domestic applications.

This range of security safes are an essential solution for the safe keeping of your assets with the added bonus of fire resistance. The safes are filled with fire resistant concrete, which provides both security and fire resistance.

**The Guardmaster Fortress** Safes utilise a list of security features normally reserved for use on larger commercial grade safes such as glass plate relocking device that is designed into the main bolt work mechanism and will activate if the combination lock is attacked and dislodged. The Guardmaster safes are manufactured in several sizes to accommodate all needs.

### Specifications

**Door:**

45mm thick

**Body:**

70mm thick

**Bolt Work:**

3 way on BS29, BS41

4 way bolt work on BS65 upwards

**Automatic Re-locking:**

All Guardmaster Fortress safes are fitted with glass plate triggered re-locking device. Should the locks be dislodged or attacked the re-locking system will activate and block the retraction of boltwork

**Boltdown Facility:**

All Guardmaster Fortress safes come with single bolt-down hole as a standard feature located in the base of the safe, and are accessible only from the inside.

**Lockdown:**

The Guardmaster Fortress range of safes comes standard with 1 x 3 wheel combination lock

**Optional locking:**

1 x Key Lock or;

1 x digital electronic lock;

1 x Thermal relocker for higher Insurance Risk Rating

The Guardmaster Fortress Series is a range of safes ideally suited to Commercial and Domestic applications. It is designed to protect against a series of attacks using such tools as crowbars, screw drivers, sledge hammers and drills.
