

THE HOTEL IN-ROOM SAFE.

PEACE OF MIND PROTECTION FOR YOUR GUESTS

THE SMART SAFE

Q. Do you cater for the hotel guest of this century?

The modern traveller has become increasingly security conscious. They now expect a hotel room to have a safe where their laptops, cameras, passports, credit cards, cash, jewellery, etc are secure.

A. In this high-tech era SmartSafe has developed this unique high security key block hotel safe which is definitely the most user friendly safe in the world for both hotel guests and hotel management.

MODEL KF2000

Height	Width	Depth	Weight	Body/Door
200 mm	460 mm	360 mm	20kg	3mm/5mm

Anchor holes in base and back for easy installation.

Benefits.

- : Most reliable and cost efficient safe in the marketplace today.
- : No electronic components to break down, batteries to change and the door is secured by placing a block into the shaft on the door and turning the key.
- : These safes can add an extra source of revenue to your business by hiring the block and key to your guests.
- : Reduces downtime by staff attending rooms with the override key to unlock and reset digital safes.

Applications.

- : **Backpackers**
- : **Hostels**
- : **Hotels / Motels**
- : **Apartments.**
- : **Airport Lounges.**
